Quarterly Returns

The following chart compares quarterly total returns for the **Growth** and **Balanced** mandates against their respective benchmarks. Both mandates outperformed across all four quarters of the period.

Fig. 1 — Quarterly total returns, Growth vs Balanced, Q1–Q4 2026. Benchmarks in muted tones of their mandate colour.

Net Asset Value

Monthly NAV progression (rebased to 100 at 1 January 2026) illustrates the compound growth trajectory of each mandate. The Growth mandate reached **122.4** by year end, reflecting strong equity market conditions.

NAV Progression — Rebased to 100 (Jan 2026)

Fig. 2 — Monthly NAV, rebased to 100 at 1 Jan 2026. Composite benchmark shown dashed.

Portfolio Composition

The strategic asset allocation reflects a balanced approach to long-term risk-adjusted return. Global equities represent the largest single allocation at **45%**, consistent with the mandate's growth orientation.

Fig. 3 — Strategic asset allocation as at 30 June 2026.

Risk Attribution

The bar chart below decomposes total portfolio risk (ex-ante annualised volatility) by asset class contribution. Fixed income and alternatives provide the strongest diversification benefit relative to their weight.
